SELF-TAPPING SIEVE

As you shake, the sieve handle of Shake-It™ gently rocks from side-to-side in your hand, stopping sharply as soon as it reaches its furthest point, cleverly simulating the process of tapping the sieve with your other hand, causing the flour to fall.

Some recipes benefit from flour being sifted and mixed at the same time, this ingenious sieve ensures one hand is free for stirring and folding as you sift.

It features a fine stainless steel mesh and the handle can be removed for easy cleaning.

SHAKE-IT™ GENTLY ROCKS FROM SIDE-TO-SIDE IN YOUR HAND
